2008 – A historic year

"During a year of unprecedented market turmoil, NASDAQ OMX Nordic stood the test well, continuing to provide reliable and transparent marketplaces. In 2008 we made a number of moves to increase the attractiveness, functionality and liquidity of our Nordic marketplaces. Among other things, we began the transition to a new trading platform, based on INET, the fastest in the industry, which will further improve efficiency, reduce latency and increase throughput. Our new platform will also enable order routing functionality. To provide a better model for handling counterparty risk, we will introduce a central counterparty clearing mechanism for cash equity trading in 2009.",said Hans-Ole Jochumsen, President NASDAQ OMX Nordic.
