(Based on market capitalization)

Trading of Norwegian Equities

NASDAQ OMX Nordic will expand its offering to include trading in equities listed in Norway. Trading will take place on a submarket to our regulated market, NASDAQ OMX Stockholm. Trading is scheduled to begin Monday, March 23, 2009 with the 25 most traded securities on Oslo Stock Exchange's regulated market. In the next phases NASDAQ OMX will admit the remaining listed equities to trading. A summarized documentation will be published on www.nasdaqomxtrader.com/nordic for each Norwegian company which shares we admit to trading.

NASDAQ OMX Nordic's markets have over 700 listed companies and handle about 75% of the Nordic region's equity trades. With Norwegian equities NASDAQ OMX now enables customers to trade all equities listed on a major Nordic market on one platform in the investor friendly environment of a regulated market. The same trading rules and high quality market surveillance used for existing equities will also be applied for trading equities with a primary listing in Norway.

The move is part of NASDAQ OMX's strategic roadmap to increase the attractiveness of the Nordic equity market. Other roadmap initiatives are:

- Introduction of full central counterparty clearing which will also apply for Norwegian shares.
- Introduction of our global equity trading platform, INET
