## Updated historical values for SHB Commodity Indexes

From December 17th the time of distribution for the SHB Commodity indexes was changed from ~11.00 CET to ~23.00 CET. Due to the change of dissemination, the historical index values have been adjusted to comply with the new methodology where prices from t, t-1 are used instead of prices from t-1,t-2. Please update your databases with the attached historical index values for the SHB Commodity indexes.

File containing historical values is attached to the Newsletter.

## Updated TIP 2.1 errata document version 1.3

The errata document for TIP version 2.1 was updated on December 18th, 2009 and is available on the GENIUM Consolidated web page:

<http://nordic.nasdaqomxtrader.com/marketdata/datafeeds/geniumconsolidatedfeed/>

## Nordic Fixed Income Level 2 Clearing Data

As of the 1st of January, the fixed income related OMX Derivatives Markets are made available in the Nordic Fixed Income level 2 product accounts.

Name	Id	Source System	Source Id
DANISH BOND	356	CLICK	001004
NORWEGIAN BOND	110	CLICK	001005
SWEDISH BOND	57	CLICK	001003

For further explanation of market content, please see previous Newsletter.

# **INET Nordic migration February 8<sup>th</sup> 2010**

## **Activities in preparation of the INET Nordic launch**

In preparation of the INET Nordic launch on February 8th 2010, the GCF5 test environment will continue to be available for customer testing through January 31st with the INET Nordic PreProduction environment as source for Nordic and Baltic Equities and related instruments as well as the Icelandic Fixed Income market. General availability hours are 07:00 – 23:00 CET Monday through Sunday, but with no active support during off trading hours. For details on planned test activities such as performance and fail over please see the INET Nordic Test Calendar:

[http://nordic.nasdaqomxtrader.com/digitalAssets/66/66130\\_inet\\_nordic\\_test\\_calendar.pdf](http://nordic.nasdaqomxtrader.com/digitalAssets/66/66130_inet_nordic_test_calendar.pdf).

For current GENIUM Consolidated Feed customers there is a market wide test scheduled the evening of January 13th 2010, where the configuration planned for INET Nordic launch will be tested. The test will focus on GCF functionality, performance and fail-over. Market data vendor participation is highly recommended.
