NASDAQ OMX Nordic Markets update

NASDAQ OMX to disseminate new commodity indexes in GCF from March 15th, 2010

On March 15th, 2010 NASDAQ OMX will begin disseminating two new indexes. The indexes will be available via Genium Consolidated Feed to all Nordic equity data products subscribers.

The indexes are custom made indexes that measure the excess return of the underlying commodity futures. The indexes have a base date of November 28, 2008 with base value 500. The indexes will be disseminated once a day in Genium Consolidated Feed around 23.00 CET. Historical index values will be distributed at launch.

Code	Name	Source ID	GCF ID	ISIN	Source	MIC-code	Country
SHBGASOIL	SHB Gasoil	2 022	10260	SE0003210459	ICS_INDEX2 (ID:7)	ICEU	GB
SHBGASOLINE	SHB Gasoline	2 023	10262	SE0003210467	ICS_INDEX2 (ID:7)	XNYM	US

The two new indexes will be added to Nordic index products and Nordic equity entitlements.

Genium Consolidated Feed update

Equilibrium price dissemination during the closing auction period

In the current implementation of the INET Nordic trading solution, the equilibrium data is disseminated via the NOII message during the pre-close period until the start of the closing call uncross period, during which the auctions for individual instruments are randomly scheduled.

NASDAQ OMX Nordic will improve closing auction transparency by extending equilibrium data dissemination during closing cross until the auction of the individual instrument takes place. In the current implementation there is a general termination of provision of equilibrium data for all instruments during the final 30 seconds of the closing auction period.

The improved transparency will be introduced in the Nordic Equity TotalView-ITCH feed and the Genium Consolidated Feed simultaneously. The modification will be active in the INET OTF as well as the GCF4 test environments by Wednesday March 10th, followed by introduction in the production environment on Monday March 15th 2010.

Closing Bid/Ask in OrderbookSummary message – equities trading

The previously explained difference in system behavior regarding closing bid/ask will remain until late March (**Global Data Products Nordic Weekly Newsletter 2010 #6**). To facilitate end-of-month reporting based on closing bid for February 2010, re-calculated values was made available in file format to GENIUM Consolidated Feed Techni-cal contacts via GlobeNewswire on March 2nd 2010.

During March 2010 the establishing of closing bid/ask prices will be adjusted to be to be the same in the current INET solution as was the case in the former SAXESS solution. Detailed time schedule for the change will be communicated shortly.

Number of order levels presented on Aktietorget markets for Nordic Equity TotalView subscribers

Today, Aktietorget markets is restricted to max 5 price levels of order information available in the GCF feed, whereas max 20 levels are being provided for all the other equity markets. NASDAQ OMX will improve pre-trade transparency for Nordic Equity TotalView subscribers starting Wednesday March 10th 2010, when Aktietorget market will follow the same logic i.e. contain maximum 20 levels instead of 5 only.

This may have an impact on those customers subscribing Nordic Equity TotalView in terms of slightly increased message volumes.

Global Data Products update

Change in Baltic Equities and Fixed Income Internal Distributor Fee; effective June 2010

Effective June of 2010, NASDAQ OMX is decreasing the Baltic Equities and Fixed Income Internal Distributor Fee from € 300 to € 50. In addition, the existing Nordic Internal Distributor license fee will not include Baltic data. Fees changes will automatically be assessed on June invoices to be sent in early July 2010.

Test Environments

Genium Consolidated Feed

GCF Environment			Source Systems			
	Ver.	TIP	Equities and related	Fixed Income	Derivatives	Index
GCF2	2.1.0	2.1.0	• INET OTF/test	• SAXTST2	• CLICK Test • Nord Pool test	• ICS - test data • ICS_INDEX - test data • ICS_INDEX2 - test data
