

CO-LO @ DR SITE

NASDAQ OMX Nordic offers Disaster Recovery Co-location

Enhance your Business Continuity plans by purchasing, at a lower price, cabinets and power at NASDAQ OMX Nordic Disaster Recovery (DR) site. In the event of unavailability of our primary site, customers subscribing to this service will be able to continue running their latency critical business from cabinets located at our DR site and with the same service levels as provided to our primary co-lo site.

ABOUT THE OFFERING

Given the increasing importance of low latency access NASDAQ OMX Nordic offers Co-Lo @ DR Site; an opportunity to place cabinets for disaster recovery or failover purposes in our secondary site.

Due to the nature of this service and the limited capacity at the NASDAQ OMX Nordic DR site, the following limitations apply:

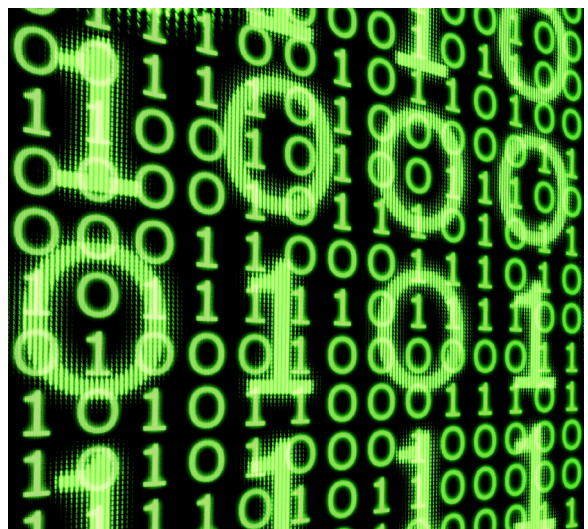

- > Maximum two switch ports per customer
- > Offering is limited to customer that are already present in our primary co-location area
- > Installation at the DR site cannot exceed in size (e.g. number of cabinets and power) the one at the primary site
- > Maximum power per cabinet is 3 kW

While NASDAQ OMX Nordic is NOT running from the DR site, the following limitations to the Co-Lo@ DR site service levels apply:

- > Service request for cabinets at the DR site will always be charged on a time & material basis even for customers subscribing to our Remote Hands service.
- > Access to the DR co-location site is always escorted and customers are charged on a per hour basis for the escorting service.
- > Two days notice must be provided to request access to the DR co-location site for planned maintenance.
- > Service requests will be conducted on a best effort and likely at the end of day.
- > For Planned work two (2) working days notice must be provided to request access to the DR co-location site;
- > For any emergency work NASDAQ OMX will provide an escort within three (3) hours starting from the time of the request;

- > Under NO circumstances the customer should perform the extended work such as maintenance, equipment installation, patching etc. during the emergency visit;
- > The Permanent Access List will be the same as it is for the primary site;
- > The delivery time for the cabinets and the service at DR site is approximately four (4) weeks

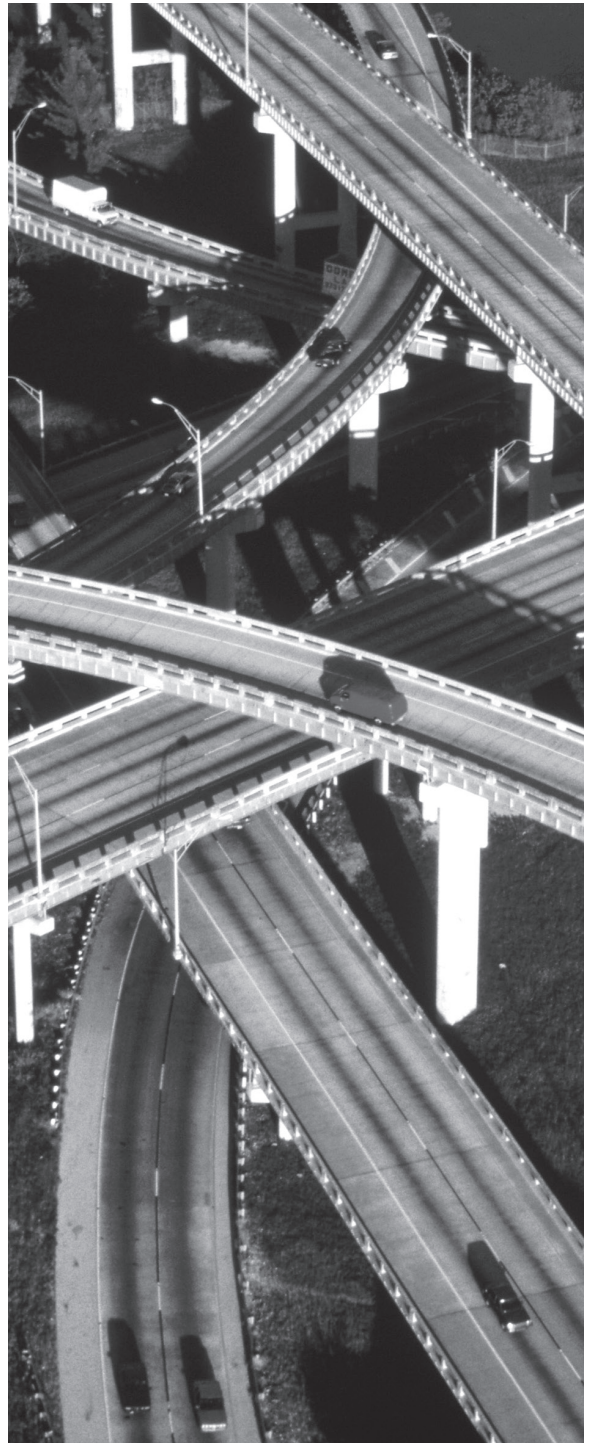

During the time any of the NASDAQ OMX Nordic markets are running from the DR site, Co-Lo @ DR Site service will be provided with the same service levels applicable for the primary co-lo site.

SECURE BUSINESS CONTINUITY TODAY!

NASDAQ OMX Nordic is now accepting requests for co-location of cabinets in our Disaster Recovery site.

Latency sensitive customers interested in enhancing their business continuity plans should consider that, due to the limited co-location capacity in our DR site, NASDAQ OMX will accept requests on a first come, first served basis.
